PROFILE SUMMARY

AI/ML Engineer with hands-on experience in machine learning, NLP, and applied Generative AI, backed by a Data Science internship building disease-prediction models and two end-to-end AI projects — a Cyber Threat Intelligence platform with ML-based threat classification, and a production-style RAG chatbot using LLaMA-3 and vector search. Skilled in Python, Pandas, NumPy, and Scikit-learn for data analysis, feature engineering, model training, and evaluation on real-world datasets. Also bring software engineering experience from a Software Development internship building production enterprise applications, giving a strong foundation in APIs, data modeling, and shipping working software — not just notebooks. Passionate about turning raw data into deployed, decision-driving AI systems.

EDUCATION

Poornima Institute of Engineering and Technology (RTU)	8.0 CGPA
• Bachelor of Technology (B.Tech), CSE – AI 2022 – 2026 (Graduated)	
SPS Senior Secondary School, Losal (RBSE)	79%
• Senior Secondary (Class 12th)	

EXPERIENCE

Software Development Intern – Virtuowhiz Consulting Pvt. Ltd., Jaipur	Apr 2026 – Present
• Completing a 5-month, in-office software development internship, designing and building production-style enterprise applications end-to-end, including custom data modeling, business logic automation, and API-based integrations.	
• Built two mentor-assigned, full-stack applications (Hospital Management System, Hotel Management System) covering entity/data modeling, workflow automation, and role-based access control.	
Data Science Intern – Softech Era Pvt. Ltd.	May 2025 – Jul 2025
• Built ML-based models to predict diseases such as diabetes and heart conditions, working through data preprocessing, feature engineering, model training, and evaluation.	
• Communicated technical outcomes in simplified terms to non-technical stakeholders, translating model results into actionable insights.	
Cyber Security Intern – Grras Solutions Pvt. Ltd., Jaipur	Jul 2024 – Oct 2024
• Performed vulnerability assessments and penetration testing aligned with OWASP Top 10.	
• Assisted with incident response and created security awareness material.	

TECHNICAL SKILLS

- **Programming:** Python, C++, Object-Oriented Programming (OOP)
- **Machine Learning & AI:** Machine Learning, NLP, Feature Engineering, Model Training & Evaluation, TF-IDF, Classification (Logistic Regression, SVM)
- **Generative AI:** LLM Integration (LLaMA-3), Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases (ChromaDB)
- **Data & Analysis:** Pandas, NumPy, Scikit-learn, MySQL, APIs & REST Services
- **Software Engineering:** Apex, REST APIs, OAuth 2.0, Data Modeling, Process Automation
- **Tools & Platforms:** Git, GitHub, VS Code, Streamlit

AI/ML PROJECTS

Cyber Threat Intelligence Platform with ML-based Threat Classification	Link
<i>Python, Pandas, Scikit-learn, Streamlit</i>	

- Built an end-to-end AI-powered CTI platform to collect, preprocess, and analyze cyber incident data.
- Implemented an ML-based text classification model (TF-IDF + Logistic Regression/SVM) to automatically classify threats such as phishing, malware, and ransomware.
- Designed a real-time prediction pipeline and an interactive dashboard for monitoring cyber threats.

Website-Based AI Chatbot using RAG (LLaMA-3)

[Link](#)

Python, LLaMA-3, ChromaDB, NLP

- Designed and implemented a production-style Retrieval-Augmented Generation (RAG) system that answers queries strictly from indexed website content, rejecting out-of-scope questions instead of hallucinating answers.
- Used ChromaDB for semantic search and a locally hosted LLaMA-3 model for inference, applying vector embeddings for accurate context retrieval.

CERTIFICATIONS AND ACHIEVEMENTS

- Letter of Recommendation (LOR) from Grras Solutions Pvt. Ltd. for excellent performance during Cyber Security Internship – 2024
- Completed Ethical Hacking Internship – Grras Solutions Pvt. Ltd., 2024
- Participated and qualified in national-level hackathons: Smart India Hackathon, Rajasthan Police Hackathon
